Thursday 25th February 2010

Dear Sirs,

Our main business is the mobile sawmilling services and on-site timber conversion. We employ six full time staff and have been using Aspen for about three years.

We started using it because we recognised the health benefits, the maintenance benefits and the added bonus of it being pre-mixed. The guys are on the saws for about six hours per day.

Before using Aspen [alkylate petrol], there were complaints of headaches, nausea and fatigue. Now we hardly ever get complaints and we have gone from one sick day a month to two or three a year.

Employees have also commented on the working environment being more enjoyable.

Kind regards,

Acorn Milling Ltd

Andover, Hampshire.
