

Recently retired writer Mick Dunstan has more time to devote now to gardening – and Aspen 4 fuel has already made a real difference to his horticultural efforts.

“I bought a pretty decent petrol shredder a few years go but have never really been that happy with it. I’ve never been able to get it to start easily. Sometimes, It simply wouldn’t start at all. It’s been a real problem,” says Mick, from Worcester.

“When I complained to the supplier, he said my problem was that normal unleaded fuel goes off pretty quickly. He recommended Aspen 4 as having a shelf life of five years or more – which is just perfect for me.

“I contacted Aspen and since I started using the fuel, my shredder has started straight away - first time every time. It’s brilliant. I can’t recommend it highly enough. I wish I’d discovered it ages ago.”
