

Dear Sir,

My name is Bill Nicklen and I live in Winterton, in North Lincolnshire, England. I have just purchased a two stroke petrol Strimmer/Brush cutter. Never having used one before, I took the advice of the company I purchased the cutter from, and bought 5 litres of your ready mixed two stroke fuel.

On 10th February 1999 I underwent a Heart & Lungs transplant, and have stayed in good health since that date, so I was pleased to find that I could purchase a fuel that would protect me, as well as the environment. Thank you, I used the Cutter for the first time today. The machine started without any problems, there was no petrol smell, or exhaust fumes at all, the cutter ran sweetly for over one hour, I was more than pleased with your product.

I see the Transplant team every six months, and they always are inquisitive as to why I stay so healthy, this information is very important to them to aid in future Transplants, I will mention to them that your product would be beneficial to any transplant recipient attempting to live a healthy normal life.

I am so pleased with this fuel that I thought I'd write to you and let you know that I will always purchase your product in the future,

Very best regards,

Bill Nicklen.
